

“Develop With” Get Together 1st & 2nd of March 2012 Prahan, Victoria

As an escape from the day to day, come and join others and find out how using the ibCom digital structures can transform how people work with information and each other.

In an informal setting, meet, talk with and listen to people working with this application framework and find out how through flexibility and simplification they are changing the user experience and creating highly engaging applications.

A number of our partners will be hosting sessions ranging from a recap of the onDemand platform through to *how to's* based on real customer examples. We will also have a reserve list of topics that can be discussed during the 2 days, based on attendee preferences.

The get together will be hands on and interactive.

On the Friday we will build a real application for one of our partners and see how many speed records we can break and how many people we can have working simultaneously! This is a great opportunity to see how it all works – from creating a blank space through to a fully customised application, including branding.

We'll also demonstrate a version running on Windows 8 and show how you can prepare for it.

ibCom, in association with some of our partners, is sponsoring the event, so your only cost is getting to Prahan, Melbourne and your accomodation. We have chosen a Thursday & Friday so you can add on a weekend in Melbourne if you wish.

To allow people to fly in Thursday morning we will be:

- **Starting at 11AM on Thursday the 1st of March**
- **Finishing 3PM Friday**

The conference and accommodation will be at:

TH CULLEN
164 Commercial Road
Prahan, Victoria, Australia

ibCom and our development partners have done some amazing work over the last year and we would love to see you there to share ideas on what we have done and can do together, what you can do with it, and how together we can improve it!

Please email back your interest in attending to:

developwith@ibcom.biz

and we will book your spot and organise your accommodation if required.

If you have any ideas for the get together, then please visit:

ibcom.uservice.com

Thanking you,
Mark Byers & Chad Armstrong
On behalf of ibCom
